

High-school students, university students, pupils and teachers, come to Bergen!

We invite everybody to the second European Forum for Education in Bergen/Norway, May 20th – 22nd 2005

At the same time, the conference of the European ministers of education will take place.

Bergen is a small city on the western coast of Norway. Very cheap flights are available if you book your flight well ahead. More info on the homepage

You will not meet any icebears, whales or trolls, but many critical persons concerned with the future of education (and maybe a moose).

European Education Forum

Lycéens(nes), étudiants (es) et enseignants, venez tous à Bergen!
En réaction à la conférence des ministres de l'éducation européens nous vous appelons à participer du 20 au 22.5.2005 à Bergen au 2. forum européen de l'éducation.

What is the future of education?
What about tuition fees? Should everybody have the possibility to study?
What will school be like in the next 5-10 years?
What influence do international agreements have on our education system (GATS, Bologna declaration)
How should our education system be organized in a united Europe?
What can we learn from other European countries?
Which aims should education have, and on which ideas should education be based?

All these are explosive issues, which are going to be discussed on the EEF.
We are expecting people from all over Europe to participate at the workshops offered by the supporting organizations.

Simultaneously the conference of the European Ministers of Education is taking place in Bergen. These ministers are discussing and deciding on these issues- without listening to your opinion.

It's about your education, about your future!
Be present at the EEF to discuss with people from all over Europe!
